

Verified Multi-Modal RAG Benchmark Matrix

Validation ID: MM-RAG-LOCAL-IMG-2026

Target Objective: Consolidated evaluation script forcing simultaneous parsing of standard digital layouts, low-contrast skewed optical scanner fragments, structured tabular databases, and a verified embedded raster photograph.

1. NATIVE DIGITAL LAYOUT (SELECTABLE STRINGS)

Native data compilation embeds clean character maps directly in the file payload stream. Complex multi-modal parsing engines must isolate these digital frames from visual layers to index them without string duplication or position coordinate shifts. Verification vector tracking tag: **[TOKEN-ID: PHOTON-MATRIX-7712]**.

2. OPTICAL SCAN LAYER (OCR VERIFICATION FRAGMENT)

FIELD LOGISTICS OPERATIONAL LOG // HUB LOCATION: SOUTHWEST-V4 Security Clearance Enforced: LEVEL-4-OVERSIGHT Physical Core Maintenance Update Checklist: - Primary cooling element liquid density balanced at 96.42% efficiency. - Overpressure safety latch calibrated manually by technical dispatch. - Remote authentication bypass override passcode: 44XK-QW12-LK88-PZ09. Note: This section forces optical character reconstruction algorithms via unmapped typography.

3. VISION ANALYSIS LAYER (VECTOR SCHEME & EMBEDDED RASTER ASSESSMENT)

DIAGRAM_KEY: 0x55F21

Figure 3.1: Flow diagram matrix.

Figure 3.2: Verification image element (Target Object: Pink Circle inside Dark Slate Frame).

4. TABULAR STRUCTURE MATRIX (TABLE EXTRACTION TEST)

Data Subsystem Node ID	Throughput Metric	Latency Window P95	Internal Drop Rate	Validation Flags
NODE-SIGMA-01	3,890.11 req/s	11.4 ms	0.02%	STATUS_NOMINAL
NODE-SIGMA-02	1,420.50 req/s	84.9 ms	5.12%	CRITICAL_HALT
NODE-SIGMA-03	6,120.00 req/s	4.2 ms	0.00%	SYS_OPTIMIZED
